Cypripedium

Armacest & Hoyston, Inc.
Los Angeles, Calif.

THIS is our new price list of *Cypripediums*. It will be noted that there are quite a number of items which were not included in our last catalog. The interest in *Cypripediums* is steadily increasing for they have much to recommend them in their long lasting quality and the more subtle color tones and in the improved shape and color of the newer hybrids.

Then, again, it is being increasingly demonstrated in the more favored spots in Southern California and Florida and perhaps even elsewhere, that these orchids will grow and flower out-of-doors. In a private garden in Santa Barbara, California, we have seen *Cypripediums* grown to perfection, producing larger and finer flowers on the same varieties than we have yet been able to do in the greenhouse.

Our list contains some of the oldest and some of the newest hybrids in what is at least one of the most complete collections of these orchids in the United States.

- ABERDONIAN** (Lord Wolmer x Lucifer) \$10.00
Medium sized, gaily colored. Perilla purple veins streak upwards and outwards through the white ruffled dorsal. The pouch and petals are deep perilla purple with a hint of white in them.
- ACTAEUS** (insigne x Leeanum) \$ 7.50
This fine medium sized *Cypripedium* depends for emphasis on its Indian red pouch with wax yellow trim. The subdued petals and dorsal combine neutralized tints of russet and apple green and there is a snow-white dorsal trim that fairly glistens.
- ACTAEUS, var. LANGLEYENSE, F.C.C.-R.H.S.** (insigne *Sanderae* x *Leeanum*) . . . \$10.00
This well-known variety has an upright white dorsal colored but slightly near the base in citron green and graced by a sprinkle of pin-point dots. The petals and pouch repeat the green coloring and add a touch of pale sorghum brown.
- ACTRESS** (*Enchantress* x *San-Actaeus*) \$ 5.00
Basic color through petals and pouch is sorghum brown accented by deeper veins. The dorsal is white with citron green veins appearing about half way down. The color is relieved by a generous sprinkling of pin point spots.
- A. DE LAIRESSE** (*Curtisii* x *Rothschildianum*) \$10.00
The dorsal is small in comparison with the size of the pouch. It is white, marked with narrow vertical Indian red stripes on a white background. The very dark, thin, slightly curled petals are covered with tiny Indian red dots on white with a hint of light Chalcedony yellow near the center. Short, dark hairs outline the petals. The pouch is Indian red, long and almost rectangular in shape.
- AESON** (*Druryi* x *insigne*) \$ 7.50
A strong hybrid in the way of *insigne* var. *Harefield Hall* but much more shapely.
- AIGRETTE** (*insigne* v. *The Queen* x *Phantasy*) \$25.00
Greenish-yellow with the upper half of the dorsal white. Medium size.

This spotted beauty capitalizes on its white dorsal trim which extends but half way around the top dorsal for its mark of identity. The rest of the dorsal is solid apple green forming a background for many small dark spots. The petals repeat the dorsal combination, but the pouch, to offer contrast, is solid Indian red tipped in wax yellow.

Large size. Purplish pouch edged in amber. The petals are a combination of purple and amber. The unusually large dorsal is brownish at base changing into lavender with a wide white border. There is, however, a great variation. Some varieties of this hybrid show no purple at all but are made up of a ground color of chartreuse tinged with brown and lined and spotted. The dorsal is two-thirds green spotted brown with a white margin and there are variations between these two types.
- AMBER** (Cyclops x nitens-Leeanum) \$15.00
One of the new hybrids of pleasing amber coloring. Size and form and length of stem are satisfactory also.
- AMBITION, FINE VARIETY** (Fairrieatum x Gwen Hannen) \$50.00

Be this as it may, it is one of the grandest Cypripediums in cultivation. The wide white dorsal is veined half way in apple green spotted somewhat in dark brown. The pouch and petals blend softly from a sorghum brown to a dull apple green and there are a few spots on the latter.

White Cypripediums

Here we list a number of well known "white" varieties, a collection of which we have been endeavoring to build up for a number of years. When well grown unquestionably these are among the most beautiful orchids in cultivation and while they are not pure white, they are in varying degrees close to the much sought-after pure white.

We are glad to be able to offer what we believe is the most complete stock of white Cypripediums in commercial channels in the United States.

ALBION (niveum x Astarte) On Application

This small dainty Cypripedium of perfect proportions is a delight to the eye. It is snow-white with the exception of a touch of light oriental green against the faintest flush of yellow on the column and the smallest amount of minute spots near the center.

ALBION BODNANT, F.C.C.-R.H.S. On Application

A fine form of the above.

ASTARTE (insigne v. Sanderae x Psyche) " "

Both this and Chastity compare very favorably with the most modern whites for size, form and all-round quality, Astarte being a slightly clearer white than its hybrid, Chastity.

CANTATRICE (Florence Spencer F.C.C. x niveum) " "

Small flower. Creamy white with the exception of some rose spotting.

CHASTITY (Astarte x Nell Gwynne) " "

One of the best of all the whites. Of good size, exceedingly pleasing form, the flowers when first open are pale greenish-cream but as they mature this turns to creamy-white. It is strong growing and definitely one of the best.
